

KEYWORDS

- are words or phrases that are relevant to the content of your abstract and specifically define your research work.

Adaptive immunity	Heart	Rare/orphan diseases
Animal Models	Imaging	Real-world evidence
Anti-phospholipid syndrome	Infection-related RMDs	Registries
Artificial Intelligence	Inflammatory arthritides	Rehabilitation
Autoantibodies	Innate immunity	Remission
bDMARD	Investor initiated trial	Rheumatoid arthritis
Behcet's disease	Kidneys	Safety
Best practices	Lifestyles	Sarcopenia
Biomarkers	Lungs	Self-management
Bone diseases	Malignancy	Sjögren syndrome
Cardiovascular disease	Mental health	Skin
Cartilage	Mixed connective tissue disease	Spondyloarthritis
Cell biology	Motor function	Synovium
Clinical Trials	Myositis	Systematic review
Cognitive Function	Non-pharmacological interventions	Systemic lupus erythematosus
Comorbidities	Nursing	Systemic sclerosis
COVID	-omics	Tapering
Crystal Arthritis	Organ damage	Targeted synthetic drugs
Cytokines and chemokines	Osteoarthritis	Telemedicine
Descriptive Studies	Osteoporosis	Treat to target
Diagnostic Tests	Outcome measures	Ultrasound
Diet and Nutrition	Pain	Undifferentiated connective tissue disease
Disease-modifying Drugs (DMARDs)	Patient information and education	Uveitis
Education	Patient reported outcomes	Vaccination/Immunization
Enthesitis	Patient-led research	Validation
Epidemiology	Physical therapy/Physiotherapy	Vasculitis
Fibromyalgia	Pregnancy and reproduction	Vitamin D
Gastrointestinal tract	Prognostic factors	Work-related issues
Gender/diversity issues	Psoriatic arthritis	
Genetics/Epigenetics	Qualitative research methods	
Geographical differences	Quality of care	
Gout	Quality of life	
Health Services Research	Randomized control trial
